PROFESSIONAL SUMMARY

Full-Stack MERN Developer and Computer Science undergraduate with hands-on experience architecting and deploying two production-ready, AI-integrated web applications end to end. Skilled in RESTful API design, JWT authentication, responsive UI development, and third-party AI integration (Google Gemini). Solved 125+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks. Seeking a Software Engineering Internship or Entry-Level Software Engineer role in MERN, Full-Stack, Java development.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Database: MongoDB, MongoDB Atlas, Mongoose, CRUD Operations

AI & Cloud: Google Gemini API, Prompt Engineering, Cloudinary, Vercel, Render

Tools: Git, GitHub, Postman, VS Code

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PERSONAL PROJECTS

AI Resume Analyzer | MERN Stack, Google Gemini AI, MongoDB, Cloudinary

June 2026

[GitHub](#) | [Live Demo](#)

- Architected and deployed a full-stack AI resume-analysis platform on the MERN stack, enabling users to upload a resume PDF and receive an instant ATS score, keyword gap analysis, and tailored improvement suggestions.
- Engineered secure JWT-based authentication and Cloudinary-backed PDF upload, protecting user sessions and resume data across all API routes.
- Integrated the Google Gemini API using structured prompt engineering to generate consistent ATS scores, resume summaries, keyword breakdowns, and missing-skill recommendations.
- Reduced redundant AI API calls to zero for previously analyzed resumes by persisting Gemini output in MongoDB and serving cached results, cutting repeat-request response time and Gemini API cost.
- Deployed the frontend on Vercel and backend on Render for continuous public availability.

DailyNews AI | MERN Stack, Google Gemini AI, REST APIs

March 2026

[GitHub](#) | [Live Demo](#)

- Built and deployed a full-stack news platform enabling users to browse, search, filter by category, bookmark, and publish community news articles through 12+ RESTful API endpoints.
- Integrated Google Gemini AI with a custom-engineered prompt to auto-generate structured article summaries (main event, key highlights, and significance), reducing article read time for end users.
- Implemented JWT authentication with bcrypt password hashing and ownership-based authorization, ensuring only an article's author can edit or delete their own content.
- Optimized news retrieval performance via server-side pagination (10 articles per request) in place of full-payload fetches, lowering initial load size and improving perceived speed.
- Designed a normalized MongoDB Atlas schema across User, Article, and Bookmark collections, using userId references to scope every query to the authenticated user.

EDUCATION

Galgotias University — Greater Noida, Uttar Pradesh

2023 – 2027

Bachelor of Technology (B. Tech) in Computer Science & Engineering | CGPA: 7.51/10

M.S. College — East Champaran, Bihar

2021 – 2023

Senior Secondary (Class XII, BSEB) | Percentage: 71%

Utkramit Madhyamik School — East Champaran, Bihar

2021

Secondary (Class X, BSEB) | Percentage: 81%

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Certification — Software Testing (Elite) | Design Thinking
- Solved 125+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
- Independently built and deployed two production MERN applications with integrated Google Gemini AI, live and publicly accessible.
